EDUCATION

University College London (UCL) | *London, UK* [Sep 2025 – Jun 2028 (Expected)]
Psychology and Language Sciences BSc | First-Class (Year 1)

- Relevant Coursework: Brain-Computer Interface, Linguistics, Cognitive Psychology, Statistical Methods

Kwangwoon University | *Seoul, South Korea* [Mar 2021 – Jan 2022]
Industrial-Organizational Psychology

- Relevant Coursework: I/O Psychology, Organizational Behavior, Human Resources Management

WORK EXPERIENCE

Research Assistant Intern | *University of Oklahoma | Hybrid (US / UK) | Full-time* [Jun 2026 – Present]

- Engineered an LLM classification pipeline to evaluate 700+ papers against screening criteria, achieving high inter-rater reliability ($\kappa = 0.98$) while resolving complex edge cases through iterative QA refinement.
- Automated the collection and deduplication of 600+ papers by linking journal APIs to Zotero via MCP, programmatically archiving citation metadata and full-text PDFs.
- Operationalized a 2x3 psychometric study in Qualtrics (N=680), configuring TIRT blocks and latency telemetry to objectively quantify cognitive load across Likert and MFC formats.
- Collaborated with PhD researchers to formulate a moderated-mediation model examining how situational strength buffers AI-induced Counterproductive Work Behaviors (CWBs).

Server | *WooJung Korean Restaurant | London, UK* [Feb 2026 – Jun 2026]

- Synchronized FOH-BOH operations by leveraging military culinary experience, coordinating service flow for 200+ daily covers to eliminate order bottlenecks.

Sergeant (Culinary Specialist) | *Republic of Korea Army | South Korea | On-site | Full-time* [Jun 2022 – Dec 2023]

- Led and supervised a squad of 25+ personnel, managing daily operations, performance evaluation, and conflict resolution to maintain high morale and operational effectiveness.
- Coordinated logistics and food service operations across 5 military units, delivering 800+ meals daily with zero service disruptions.

INDEPENDENT RESEARCH & PROJECTS

Personalized LLM Knowledge Graph (Obsidian) | *Personal Project* [Jul 2026]

- Engineered an automated ETL pipeline converting unstructured digital assets (Outlook emails, web logs) into an interlinked Markdown knowledge base.
- Designed a schema-driven routing system to systematically classify people, tools, and academic concepts using YAML frontmatter and automated tagging.
- Implemented a two-phase data linter combining rule-based checks and AI semantic sweeps to eliminate duplicate notes and resolve broken links.

CERTIFICATES & PROGRAMS

Python for Data Science and Machine Learning Essential Training | *LinkedIn Learning | Online*

- Built end-to-end data analysis pipelines, EDA, and predictive models using NumPy, Pandas, and Scikit-Learn.

Celonis Mastercourse in Process Intelligence & Enterprise AI | *Celonis x UCL | Online*

- Applied process mining and enterprise AI to analyze, visualize, and optimize organizational workflows at scale.

Google Data Analytics Professional Certificate | *Google (Coursera) | Online*

- Utilized SQL, R, and Tableau to architect end-to-end analytics pipelines from complex raw data to visual insights.

SKILLS

Research: Quantitative Research, Meta-Analysis, Factor Analysis (e.g., CFA), Psychometrics (MFC)
Tools: Python, R, SQL, Tableau, Celonis (Process Mining), Zotero, Qualtrics
Languages: Korean (Native), English (Fluent)
